USA.NET[®]
Global eMessagingsm

You run your business. We'll run your eMessaging.[®]

Encrypted email is becoming a critical security service for business email users that need to ensure the confidentiality of information transmitted via the Internet. Email encryption provides complete protection for sensitive information including employee and patient records, payroll and financial reports, legal documents, design specifications, account information and trade secrets.

DELIVER ENHANCED MESSAGING SECURITY

WITH USA.NET'S CUTTING EDGE AND USER-FRIENDLY EMAIL ENCRYPTION SOLUTION.

BUSINESSES NEED TRUSTED COMMUNICATIONS

Organizations are facing new challenges as they rely more on email for trusted communications. In today's world, businesses need to consider mitigation of risks associated with the electronic transmission of sensitive information. Non-compliance with regulations or theft of sensitive information are unacceptable outcomes for businesses today.

USA.NET ENCRYPTED EMAIL SOLUTION: CUTTING EDGE AND USER-FRIENDLY

With USA.NET, anyone can subscribe for a low monthly fee to send unlimited *USA.NET encrypted email* without any investment of capital or human resources for an encrypted email infrastructure. This simple, user-friendly solution is a critical asset for regulatory compliance, reduces risk of liability and associates your brand with trusted communications. *USA.NET encrypted email* protects against unauthorized disclosure of private and confidential information as well as protecting the integrity of the content of email by locking the message until sender and recipient identities are confirmed. Once a small plug-in is downloaded, the subscriber simply clicks on "secure" in his email application, and the email is encrypted and ready to be sent to anyone.  - A turnkey encrypted email solution to provide that extra layer of security.

THE USA.NET ENCRYPTED EMAIL BENEFITS ARE CLEAR

Anyone can sign up - Virtually ANYONE using Outlook or Outlook Express may subscribe to the *USA.NET encrypted email* service.

Helps with Regulatory Compliance - Encrypting email protects the privacy and integrity of communicating personal information via email which is mandated by legislation such as HIPAA, SOX, GLBA and CB 1386.
