

COMMERCIAL MESSAGING SERVICE

An Affordable Alternative to Microsoft® Exchange Hosting

THE PROBLEM OVERVIEW

- ▶ Traditional web based email is often less secure, less reliable, and lack the features needed for true business email
- ▶ Many email services are too costly for smaller offices, nonprofits, and affinity groups to privately brand
- ▶ Minimal customization is allowed in most hosted email services

USA.NET COMMERCIAL MESSAGING SERVICE OVERVIEW

Commercial Messaging Service (CMS) is USA.NET's patented business email hosting service that offers business class reliability at a lower per seat cost than traditional on site systems. Our CMS service is a feature-rich brandable email service that can synchronize with both your Outlook® client and wireless devices. In addition to the standard Web interface, CMS can also support POP, IMAP and SMTP protocols.

Our CMS service provides multi-layer virus scanning for maximum data protection. It also offers a suite of collaborative features including calendaring, task management and mobile access. We offer five tiers of service, so you can match features and storage with the needs of your users.

THE USA.NET COMMERCIAL MESSAGING SERVICE

The USA.NET CMS works for organizations of any size, and gives you a robust and reliable web-based email service. The intuitive web interface is customizable, enabling all businesses the ability to deliver the features and layouts that best serve the needs of their end users.

CMS integrates with your company's existing directory, provisioning, portal, fax, CRM or other applications, providing greater performance, productivity and synergy.

THE BENEFITS OF USA.NET'S COMMERCIAL MESSAGING SERVICE

Key Features	Benefits

CMS ENTERPRISE - All the functionality of CMS WEB plus:

Key Features	Benefits
Calendaring, Tasks, and Notes Management	Employees work easier and smarter while saving time and frustration with features such as recurring events, meeting reminders, agenda review, notes section and event invitations.
Outlook Two-Way Synchronization	Access and synchronize your CMS calendars, contacts and tasks from your computer with an Outlook client and internet connection.
Wireless Device Two-Way Synchronization	Use CMS with commonly available 3rd party plug-ins to access and synchronize your calendar, contacts and tasks using your hand-held device.
Flexible Storage Options	Your organization receives a total storage allocation that you can distribute across your users, to optimize the use while minimizing the costs associated with storage.
Advanced Services	Archiving, encrypted email, SPAM filtering, content filtering and instant messaging.
Reporting	Web-based reports that detail user logon statistics, storage consumption, gateway services (virus, spam) performance and message traffic. The reports can also be downloaded to Excel via .CSV format so they can be imported into local database/reporting applications for further analysis and trending.
